

GTA.V.HIGHLY.COMPRESSED.2014.[13GB.TO.70mb]

DOWNLOAD: <https://bylily.com/2ikq7i>

is available here for free. This is the uncompressed version of the game. Please DO NOT DOWNLOAD the.rar files as it contains viruses. We do not support nor condone the download and or playing of.rars Its still a pretty nice looking game, and the lighting is pretty good. But there are some glaring problems. This is a beautiful, yet terribly designed city. Now i know that seems like an odd thing to complain about but consider this: the people that built the city were probably the same people that designed the buildings and the vehicles. Yet when you look at the city, you notice that the buildings are not architecturally pleasing. The same with the vehicles. That is why we can have beautiful yet ugly vehicles. For example, i saw a video on youtube about the new uber xe and it looks amazing. However when you look closely, the vehicle looks like a prototype vehicle. But i still like it, not that u can't design an amazing vehicle. I just think that the city looks pretty bad. The colors are off. The vehicles are ugly. They look like a bunch of boxes stacked together. Like i said the city looks really good but the vehicles look bad. The buildings also look bad. Just look at the street signs. They are very simple signs. The background is not nice and the font is very simple. So when i look at the city, i just see boxes. Now don't get me wrong, i love the city's size. It's huge! It's big, like GTA5 times two. But the city design itself sucks. I just wish they took more time to really make the city look good. The two games both got a ton of recognition in the industry. They were both acknowledged for being one of the best games. But if you compare it to them, you would find that a significant amount of work was put into the city. Why can't they have something that works? Anyways, i hope you guys enjoy this great game and it's story mode. Superb and brilliant gameplay. Best driving experience I've ever had. The whole game plays like an old PC game (futuristic story, excellent animations, cars behave exactly as in the PC version). I highly recommend this game. 9/10 Quick opinion: It's not a GTA game but it has similar elements to the games and you can feel the freedom of driving. It's pretty good. The story mode is really short. However it 82157476af
