About This Game

Moduwar - The Modular RTS is a unique take on Real-Time Strategy.
Take control of a **Modu** - an alien creature with an ability to grow different organs, split and re-attach them, depending on your personal playstyle.

The **Modu** are native to the planet Arkadia - an untamed paradise. They lived on Arkadia peacefully for millenia, changing and adapting their modular bodies to accommodate their every need.
Their peaceful existence was interrupted when invaders came - two warring races, fighting in a war started in a different galaxy. Both races enslaved the *Modu*, and weaponized their miraculous adaptability.

You will take the role of a *Modu* serving the *ERE - Earth Repatriation Expedition*. You will be exploited by humanity to fight their monstrous enemy.
Will you free yourself from the shackles of the ERE, or will you accept the lesser evil in a war that might determine the fate of all life in the universe?

Features

- Customizable Units: Grow your Modu, a base-unit that can split and reassemble, depending on your strategic needs and personal preferences.
- Explore Arkadia, a magnificent planet full of alien flora and fauna.

- Learn more about the Modu in a **Single-Player** story driven campaign, or play against your friends in **Multiplayer** mode.

- Grow weaponized organs or biological power-ups, to unlock dozens of unique combinations.
